Making Math Real: The Clinically Prescriptive Methodology for Students with Math LD – A Workshop for Educators & Parents

*A Special Seminar
by David Berg, E.T.*

Making Math Real™
INSTITUTE

Saturday, April 28, 2018 • Athena Academy, Palo Alto

Research over the last 40 years has repeatedly indicated all students benefit most from direct and explicit instruction, especially those with math LD. Now, more than ever before, with the profusion of discovery methods in public and private school math classrooms, students with math-LD need and deserve direct and explicit simultaneous multisensory structured teaching to provide them with the math development they require now and into their futures. This 1-day seminar will provide the research basis from neurobiology and cognitive science and the foundational developmental structures, content, and methods that empower educators to be clinically prescriptive for all students with math LD.

WHEN: Saturday, April 28, 2018
9AM – 4PM WORKSHOP / 4 – 5PM Q&A

LOCATION: Athena Academy
525 San Antonio Avenue, Palo Alto, CA 94306

REGISTRATION: Register directly through NCBIDA
<https://norcal.dyslexiaida.org/making-math-real-event-registration>

Cost: \$80 – General Public; \$50 – NCBIDA members
Price includes all day workshop, morning coffee/snacks, and lunch

Presented by David Berg, E.T.

Creator of the Making Math Real Simultaneous Multisensory Structured Methods
and Founder and Director of the Making Math Real Institute
